ABOUT ME

I'm an artist based in the US. I strive to create emotive and narrative-driven artwork. My pieces often explore mythology, history, and fantasy. While my personal works lean towards illustration, I've recieved a degree in Digital Arts and Sciences from the University of Florida to apply my skills towards a multitude of industries including game design, animation, UI/UX design, and more. I have strong communication, the ability to collaborate, project and time management skills, and I am capable of adapting to different styles of artwork.
